

## Contract Services

Metapoint provides flexible arrangements for clients requiring on-site contract staff for a predetermined or open-ended timeframe under the payroll and co-management of Metapoint's Contract Staffing.

It is becoming more and more common for large corporations to outsource their IT skills to temporary or contract consultants. The reasons for this may vary from insufficient bandwidth, skill shortage, unexpected projects or corporate initiatives. Nevertheless, it is an effective way to increase productivity and control costs. This becomes even more evident when the candidate is fully trained and versed in latest best practices and has Metapoint training and resources to fall back on when involved on any given project. We will source candidates through our extensive network of qualified and/or certified BA's. As part of our Contract Staffing Solutions, Metapoint can provide full or joint HR Management services such as performance reviews, payroll administration, contract maintenance, renewals and redeployment.
